The striatum (caudate nucleus and putamen) is the main input structure of the BG. It participates in five parallel but largely convergent loops related to the major cortical areas of the brain (Alexander, DeLong, & Strick, 1986). Given the connections between striatum and these integrative neuronal circuits, damage to striatum would be likely to result in a multitude of deficits pertaining to ...

Free will is the ability to choose between different possible courses of action unimpeded.. Free will is closely linked to the concepts of responsibility, praise, guilt, sin, and other judgements which apply only to actions that are freely chosen. It is also connected with the concepts of advice, persuasion, deliberation, and prohibition. Traditionally, only actions that are freely willed are ...

1. History of the issue. Questions about the nature of conscious awareness have likely been asked for as long as there have been humans. Neolithic burial practices appear to express spiritual beliefs and provide early evidence for at least minimally reflective thought about the nature of human consciousness (Pearson 1999, Clark and Riel-Salvatore 2001).
