Financial modeling is the task of building an abstract representation (a model) of a real world financial situation. This is a mathematical model designed to represent (a simplified version of) the performance of a financial asset or portfolio of a business, project, or any other investment.. Typically, then, financial modeling is understood to mean an exercise in either asset pricing or ...

The philosophy of mathematics is the branch of philosophy that studies the assumptions, foundations, and implications of mathematics, and purports to provide a viewpoint of the nature and methodology of mathematics, and to understand the place of mathematics in people's lives. The logical and structural nature of mathematics itself makes this study both broad and unique among its philosophical ...

Most optimisation methods use an iterative procedure. The initial set  $X$  design variables, which in the context of aerodynamic optimisation this is referred to as the baseline configuration, and is updated until a minimum of  $F(X)$  is identified or the optimisation process runs out of allocated time/iterations. In the initial set-up of the optimisation problem consideration must be given to: 1 ...
