The Fourth Edition of Applied Process Design for Chemical and Petrochemical Plants Volume 2 builds upon the late Ernest E. Ludwig's classic chemical engineering process design manual. Volume Two focuses on distillation and packed towers, and presents the methods and fundamentals of plant design along with supplemental mechanical and related data, nomographs, data charts and heuristics.

It is impractical for the design engineer to completely design a mixer, that is, define its type, diameter, operating speed, shape, and impeller type. Rather, it is reasonable for the engineer to understand the mechanical and processing essentials, and anticipated performance when dealing technically with a mixing equipment representative.
