The Master Data Management Summit is co-located with the Data Governance Conference and is Europe's only co-located conferences on MDM & Data Governance.

Master Data Management Summit Europe - IRM UK

Master data represents the business objects that contain the most valuable, agreed upon information shared across an organization. It can cover relatively static reference data, transactional, unstructured, analytical, hierarchical and metadata. It is the primary focus of the information technology (IT) discipline of master data management (MDM).. Master data is usually non-transactional in ...

"I have an Oracle 11 table which is the source for a SQL Server 2008 table. My attempts to parameterize the Oracle SQL for daily input have been confounded by what I understand to be an Oracle/SQL Server incompatibility on including parameters or variables in a SQL Command and the 4000 character limit on SQL Command from Variable.
